email: prernakashyapuw@gmail.com | portfolio: prernakashyap.com | phone: (206)-972-1075 | Seattle, WA

Product designer and analyst specialising in customer experience and growth for 3+ years, increasing retention across B2B fintech and core consumer products. Specialized in building agentic and data driven experiences for trust in AI.

Work experience

Product designer | Copart (MHCID Capstone)

March 2026 - Present | Seattle, WA

- Led design of vehicle evaluation flow for 251k MAU to drive vehicle acquisition, integrating AI-powered damage assessment, improving pricing accuracy through data based user flow restructuring.
- Reduced rage clicks by 6% by redesigning error states and skeleton screens and conducted 8 usability tests to analyze user behaviors and pinpoint moments of frustration.
- Introduced new features like offer breakdown and post offer tracking for increasing trust in the offer and extended the design system with new components.
- Collaborated with the product manager and data analyst to conduct A/B testing for the new flow, removing one of the biggest drop-off points and built interactive prototypes using Gen AI tools to rapidly iterate and explore interfaces, expedited design review cycles by 2 weeks.

Product designer | Goody hearts club (Side project)

Oct 2025 - Present | Seattle, WA

- Designed the art submission experience and built a design system with 50 tokens. Used AI to prototype and stress test for launch, onboarding 15 artists, selling out 200 stickers, planting 180 trees in 2 weeks.

Product designer | Agentic email inbox (Solo side project)

Oct 2025 - Present | Seattle, WA

- Built an AI-powered email experience for inbox organization, integrating conversational search and voice AI for reply suggestions using Cursor, Google Cloud Console for backend infrastructure.

Customer success manager, Retention insights | Kickfurther

June 2023 - Aug 2025 | Remote

- Drove 2x increase in subscriptions within Q1, influencing ~\$3M in deal flow by analyzing CRM data to anticipate capital requirements for CPG businesses and A/B testing outreach sequences, improving member retention and satisfaction.
- Reduced funds transfer time by 80% (5 days to 1) by analyzing recurring user pain points through customer interviews. Collaborated with the operations team to automate operational workflow and minimize manual intervention.
- Cut supplier verification turnaround by 22% by identifying cross-functional communication gaps through internal team & customer interviews thus eliminating idle wait times.

Founding UX designer | Matrix Labs

Dec 2022 - June 2023 | Remote

- Panacea Biotech - Redesigned the homepage and product directory dashboard for a pharmaceutical company distributing vaccines across 50+ global markets; ran heuristic evaluation and stakeholder interviews to turn dense data into filterable, decision-ready views.

Education

University of Washington

Sep 2025 - Aug 2026

Masters in human computer interaction and design

Vellore institute of technology

July 2019 - Aug 2023

Bachelors of technology in biotechnology
