

# Prerna Kashyap

Product Designer building AI-native experiences from interaction frameworks to complex workflows

pkashyap@uw.edu | portfolio: [prernakashyap.com](https://prernakashyap.com) | (206)-972-1075

## Work Experience

### Product Designer | Copart (Capstone)

March 2026 - Present / Seattle, WA

- Partnered with PMs and Data Analysts to diagnose a broken offer flow through **usability tests and FullStory behavioral analysis**, with a redesign targeting 2× vehicle acquisitions through the channel
- Designed **form components and error state microcopy** in Figma for Copart's purchase flow, reducing errors by 37%.
- Used Claude Code to build form variations and functional prototypes for the purchase flow, compressing weeks of exploration into days and **enabling early stakeholder feedback**.

### Customer Experience Manager (Product Facing) | Kickfurther

June 2023 - July 2025 / Buffalo / Remote, Full time

- Drove 2× increase in repeat consignment launches, **influencing ~\$3M in deal flow by analyzing customer behavior data** and identifying drop-off patterns across the consignment journey to drive targeted re-engagement.
- Reduced **process completion time by 80% (5 days to 1 day)** by mapping a high-friction customer workflow, identifying recurring pain points, and coordinating operational changes to clarify next steps and eliminate manual bottlenecks.
- Cut supplier verification turnaround by 22% by identifying where manual handoffs were creating delays and reorganizing a fragmented multi-step process into a streamlined, consistent workflow.

### Founding Product Designer | Matrix Labs

Dec 2022 - June 2023 / Mumbai India / Full time

- Designed a 0-to-1 brand identity and marketing site in Figma - establishing information architecture and a visual system that increased web-based lead generation by 100%
- Designed **high-fidelity UI for B2B blockchain platforms** and crypto wallets for over 8 clients, making data-dense workflows navigable for institutional clients

## Leadership and Projects

### Triage Inbox organizer | Chrome Extension

Oct 2025 - Present / Seattle WA

- Built and shipped an AI-powered Chrome extension for email triage using Cursor and Figma, integrating Google Cloud Console for backend infrastructure.
- Used Gemini as an **LLM judge to run structured evals** on the extension's conversational search and reply suggestion outputs

### Founding Product Designer | Goody Hearts Club

Oct 2025 - Present / Seattle WA

- Designed the homepage and checkout flow end-to-end in Figma, owning responsive web and mobile prototypes through to handoff

## Education

Masters in Human Computer Interaction and Design

University of Washington

## Projects

Product Development | Essence 3-Day Hackathon

*Placed top 2% of 50+ teams: designed and prototyped an IoT health monitoring interface in 72 hours, then presented design rationale and product viability to Cisco's SVP*

## Tools

Cursor  
Claude Code  
Figma  
Protopie  
Adobe Creative Suite (Illustrator, Photoshop, After Effects)  
Framer

## Skills

### Design:

Design Systems  
Prompt Engineering  
AI Interaction Design  
Responsive Web & Native Design (iOS/Android)  
Content Design  
UX Writing  
Component documentation  
Agent design

### Research:

Contextual Inquiry  
Usability & RITE Testing  
Customer Journey Mapping  
Competitive Analysis  
User Personas  
Information Architecture  
Heuristic Evaluation
