

Prerna Kashyap

email: prernakashyapuw@gmail.com | portfolio: prernakashyap.com | phone: (206)-972-1075 | Seattle, WA

Product designer and strategist with experience across customer success, research, and design in turning complex data and user needs into experiences that build emotional safety. Specialized in building agentic and data-driven experiences for trust in probabilistic systems.

Work experience

Product designer | Copart (MHCID Capstone)

March 2026 - Present | Seattle, WA

- Led design of vehicle evaluation flow for 251k MAU to drive vehicle acquisition, integrating AI-assisted damage assessment and improving offer accuracy by 16.5% through data-based user flow restructuring.
- Reduced rage clicks by 6% by redesigning failure modes and low confidence states, quantified through usability tests and synthesis of customer feedback.
- Identified key factors for funnel drop off, triangulated across 28 qualitative & quantitative sessions, informing introduction of new features like offer breakdown and post offer tracking to increase trust.
- Collaborated with the product management and engineering team to run edge cases for the new flow, removing one of the biggest drop-off points.
- Built interactive prototypes using Gen AI tools (Cursor, Claude) to rapidly iterate and explore a variety of solutions, expediting design review cycles by 2 weeks.

Product Designer | Agentic email inbox

Oct 2025 - Present | Seattle, WA

- Built an AI-assisted email experience for inbox organization, integrating conversational search and voice AI for reply suggestions using Cursor, Google Cloud Console for backend infrastructure.
- Ran evals using an LLM as a judge to flag failure modes and designed error states & microcopy for low-confidence states to increase visibility in the probabilistic system.

Customer Success Manager | Kickfurther

June 2023 - Aug 2025 | Remote

- Led weekly semi-structured interviews, contributing to a 4.5% improvement in customer satisfaction for repeat CPG customers by synthesizing customer feedback into deliverables for workflow improvements.
- Evaluated CRM touchpoints and drove 2x increase in subscriptions within Q1, influencing ~\$3M in deal flow by running complex power-queries to analyze salesforce data.
- Analyzed recurring pain points through deductive qualitative coding using Excel, reducing funds transfer time by 80% (5 days to 1) and minimizing manual intervention for the payroll team.
- Set up synthesis templates for establishing insight sharing practices during cross-team reviews, identifying cross-functional communication gaps and cutting supplier verification turnaround by 22%.

Founding Product Designer | Matrix Labs

Dec 2022 - June 2023 | Remote

- Panacea Biotech - Redesigned the homepage and product directory dashboard for a pharmaceutical company distributing vaccines across 50+ global markets; ran heuristic evaluation and stakeholder interviews to turn dense data into filterable, decision-ready views.

Education

University of Washington

Sep 2025 - Aug 2026

Masters in Human Computer Interaction and Design

Vellore Institute of Technology

July 2019 - Aug 2023

Bachelor of Technology in Biotechnology

Skills

Product Design, Interaction Design, Prototyping, AI tools (Claude, Lovable, Cursor), Design Strategy, Quantitative & Qualitative Analysis, Concept testing, Team collaboration, Customer Success, Figma, Cross-team Presentations, Stakeholder communication, Edge cases, Design systems, Usability testing, Cross-functional collaboration.
